Capital Raising Index Snapshot25

About

BC'S TOP TECH VENTURES ACTIVELY FUNDRAISING, ALL IN ONE PLACE.

BC's Capital Raising Index is an up-to-date directory of BC's tech ventures raising Pre-Seed, Seed, and Series A+ capital. The list is updated monthly to ensure every startup listed is **actively fundraising with data rooms and pitch decks ready for immediate review.**

The Index aims to bridge the gap between BC's tech ecosystem and investment capital, providing an updated reference for accessing qualified BC dealflow.

This spotlight guide features a curated selection of high-potential ventures, nominated by top ecosystem partners, making them companies to watch for investment.

This initiative, delivered by New Ventures BC (NVBC), is part of the broader Capital Compass project and is supported by Pacifican. We extend our thanks to Innovate BC and InBC Investment Corp. for their foundational support in launching the platform from 2023–2025.

Ecosystem Partners

Discover the best of BC tech! This curated selection features high-potential companies from the full Capital Raising Index, hand-picked through the strength of BC's collaborative ecosystem. We thank the following ecosystem partners for their nominations and support.

ACCELERATE OKANAGAN

ACCELERATE OKANAGAN

Driving growth and innovation for technology companies in BC's Okanagan region.

CREATIVE DESTRUCTION LAB VANCOUVER (CDL-V)

A seed-stage program for massively scalable tech companies.

VentureLabs®

SFU VENTURE LABS

Fueling high-potential technology startups with incubation and acceleration resources from SFU.

ACETECH

Connecting and empowering BC's technology leaders with peer-to-peer learning and networking.

FORESIGHT CLEANTECH ACCELERATOR

Accelerating Canada's cleantech ventures to achieve global scale and impact.

UBC SAUDER DEFENCE SCALE UP PROGRAM

Scaling high-potential, dual-use technology companies for both commercial and defence applications.

AIINB

The hub accelerating BC's artificial intelligence ecosystem through collaboration and resources.

INDIGENOUS TECH CIRCLE

Fostering Indigenous innovation and participation within the technology sector.

VIATEC, VANCOUVER ISLAND ADVANCED TECHNOLOGY CENTRE

The champion and resource for the thriving technology sector on Vancouver Island.

COUNCIL OF CANADIAN INNOVATORS

Advocating for Canadian technology companies to ensure a policy landscape that supports scaling.

INNOVATION UBC

Transforming research into impact by providing resources and support for UBC ventures.

INDEX SPOTLIGHTS

Climate, Energy & AgriTech

CleanTech, Energy Transition, Carbon Tech, AgriTech, FoodTech, Regenerative Systems, Circular Economy.

SenseNet

SERIES B

Physical AI and Edge AI for wildfire intelligence to protect people, infrastructure, and ecosystems.

SenseNet provides a wildfire detection and management platform powered by Physical AI, Edge AI, and predictive analytics. Integrating sensors, AI-cameras, satellite, and weather data, SenseNet detects smouldering fires, providing real-time alerts and behavior prediction. The platform serves governments, utilities, railways, mining, forestry, oil, gas, and critical infrastructure operators.”

Hamed Noori | hamed@sensenet.ca

Headquarters Vancouver
Launch Date 2019
Team Size 50+
Founder Hamed Noori

Client Focus B2B

Last Round Traction SERIES A (2025)
400%+ ARR growth, 12 countries, 30+ patents, and hundreds of millions acres monitored.

Raising Target \$20M

Nominated By Council of Canadian Innovators

Rockburst Technologies

SERIES A

Rockburst Technologies transforms industrial rock grinding to reduce energy use and embed carbon removal in heavy industry.

Rockburst Technologies’ cleantech platform, CoreBurst™, revolutionizes the mining and cement industries by using pressurized CO₂ to fracture rock from within. This method reduces energy consumption by up to 70% while permanently sequestering carbon. The company is currently raising a \$2M Seed round to advance their continuous-flow prototype.

Client Focus B2B
Revenue Model Manufacturing

Traction Raised ~\$6M since 2020 via industrial trials, non-dilutive & pre-seed funding.

Raising Target \$2M

Nominated By Foresight Accelerator

Ontoly

SEED

Carbon credit certification and registry for buildings.

Ontoly is the only global carbon certification platform and trading software purpose-built for buildings. They turn building emissions reductions—from retrofits, electrification, and high-performance construction—into tradable, financial-grade carbon credits, unlocking scalable climate finance and new revenue streams for the real estate sector.

Last Round 2024, VentureUS & University of Calgary
Traction \$9M LOI from an Enterprise Farm following successful paid pilot, \$30M+ pipeline

Raising Target \$2M

Nominated By
NVBC

VIRIDIS

Viridis Research Inc.

SEED

Giving water a second chance by building the most disruptive water recycling technologies on the planet

Viridis is developing a new generation of water treatment systems that leverage the power of electro-oxidation to eliminate organic contaminants from municipal and industrial wastewater. Viridis' beach-head market is the textile sector, where it is partnering with fashion brands and their suppliers to unlock water reuse in textile dyeing operations.

Last Round SEED Phase 1 (2025)
Traction Validated traction through multiple pilots, with \$300,000 in customer revenues

Raising Target \$4M (SEED Phase 2)

Nominated By Acetech

Minera Systems

PRESEED

Real-time intelligence for industrial biology. Our advanced composting platform turns waste into yield, premium products, and carbon removal

Composting is a massive global bioprocess still operating without modern instrumentation. Minera designs, builds, and deploys an advanced composting platform combining reactors and multigas sensors with an intelligence layer. We deliver the measurement, automation, and predictive insight the industry has lacked and turn every deployment into a compounding data moat.

INDEX SPOTLIGHTS

Enterprise Software & AI Infrastructure

Horizontal SaaS, Agentic AI, Cybersecurity,
Data Platforms, Developer Tools (DevTools),
Future of Work, Cloud Infrastructure.

Farpoint Technologies

SERIES A

Dual-use agentic AI coding platform for regulated enterprises.

Farpoint Technologies is an applied research AI company. Its flagship product, Fabric, is a dual-use agentic AI coding platform purpose-built for sovereign, air-gapped deployment in regulated industries — defense, government, energy, and financial services. Fabric recently achieved 99.2% frontier accuracy with an 80% reduction in cost on Aider Polyglot benchmark and closed its first enterprise contract.
